

WASTE MATTERS!

1.3 billion tons of food are wasted annually!

Reducing food waste is essential for our planet's protection and ability to provide for future generations. Mitigating waste is an action that all consumers can take to work towards a more sustainable future.

Food-waste is a global injustice...

1/3 of all food that's produced is wasted.

Where waste/loss occurs:

\$990 billion is spent yearly on producing & purchasing wasted food.

\$680 billion is wasted by developed nations, while developing nations waste \$310 billion annually.

Food-waste production & landfill-occupation account for 8.2% of GHG emissions.

If food loss & waste were a country, it would be the third-largest greenhouse gas emitter (Source: WRI).

45 trillion gallons of water (24% of all agricultural water usage) is used on producing & processing wasted food.

..while 821 million people are malnourished.
