

# Citizen Science Month

**APRIL 2021**

## **PARTICIPATE IN RESEARCH**

Science is for everyone! Join us in April to participate as a citizen scientist and contribute your observations to three brief projects.

## **LOVE BEING OUTDOORS?**

Grab your mask, camera, and head to your nearest campus to photograph the pollinators and flowers. Pollinators play a critical role in ecosystem services, but populations are declining. Help keep track of the species found on campus.

Questions? Write us!
